# **GWYNEDD & ANGLESEY JOINT LOCAL DEVELOPMENT PLAN EXAMINATION**

## **MATTERS ARISING CHANGES JANUARY 2017**

### **REPRESENTATIONS OF THE MINERAL PRODUCTS ASSOCIATION**

#### **NMC 297**

##### **STRATEGIC POLICY PS 19: MINERALS**

We generally support the changes proposed with two exceptions,

- a) Criterion two misses out an essential reference to a minimum 10 year landbank for crushed rock, making the minimum only apply to sand and gravel in the proposed changes. This should be rectified since the minimum applies to both.
- b) We reiterate that national policy requires the maintenance of a landbank during the entire plan period in accordance with PPW para 14.7.5 which says, "*Authorities should include policies in their development plans for the maintenance throughout the plan period of land-banks for non-energy minerals which are currently in demand.*"

Accordingly, we suggest the following additional changes to the criterion, (new text in *italics*)

2. Maintaining a minimum 7 year land bank of Sand and Gravel and **a minimum** 10 year land bank of crushed rock aggregate reserves **throughout the plan period** in line with national guidance.

#### **NMC 308**

##### **POLICY MWYN 4: MINERAL DEVELOPMENTS**

We are disappointed that our proposals for changes to this policy to address the qualifications to the apportionment process inherent within the RTS and mentioned in paragraphs 6.11 and 6.23 of the Topic Paper (i.e. the technical capacity for one type of aggregate to be changed for another, and whether adequate production capacity can be maintained to meet the required level of supply) have not been acknowledged even though our recollection of the hearings was that the point was accepted by the Councils. Our members are greatly concerned that there should be recognition within policy that the needs of higher quality aggregates are accepted and addressed. The existing text is inadequate because the argument goes beyond the bare maintenance of a minimum landbank in which
